MONOPLEX

ADVANCED SEALING JAW COATING

MONOPLEX

Ecological system allowing the use of 100% recyclable material.

By applying our Monoplex system to conventional machines, your filling machine can now handle mono-material films. Monoplex is a patent pending sealing jaw coating that with addition of electrostatic charges cleans itself eliminating any molten PE/PP build up. Providing perfect sealing jaws for mono-material sealing.

This system eliminates cleaning time and increases tool life of your sealing jaws.

NO PE/PP MATERIAL BUILD UP

- + 100% recyclable packaging
- + Cleaner sealed pouch
- + Reduced machine down time
- + Ability to seal mono-material
- + Consistent product every time
- + No more teflon tape
